

Tables

Official documentation is in progress, this document is just a glimpse of what is possible with pdfmake and its layout engine.

A simple table (no headers, no width specified, no spans, no styling)

The following table has nothing more than a body array

Column 1	Column 2	Column 3
One value goes here	Another one here	OK?

A simple table with nested elements

It is of course possible to nest any other type of nodes available in pdfmake inside table cells

Column 1	Column 2	Column 3									
Let's try an unordered list <ul style="list-style-type: none">item 1item 2	or a nested table <table><tr><th>Col1</th><th>Col2</th><th>Col3</th></tr><tr><td>1</td><td>2</td><td>3</td></tr><tr><td>1</td><td>2</td><td>3</td></tr></table>	Col1	Col2	Col3	1	2	3	1	2	3	Inlines can be <i>styled</i> easily as everywhere else
Col1	Col2	Col3									
1	2	3									
1	2	3									

Defining column widths

Tables support the same width definitions as standard columns:

- auto
- star
- fixed value
